

Custom Designer Library - How to use it.

Our Custom Designer Library is available to help you start choosing a new design.

To be able to design something from you we need a starting point or direction. It is no good we think you want something like circles when what you really like is straight lines.

So, to get us both onto the same page when starting we make available some designs for you to look through. You will need to download our [Custom Designer Library](#).

What we need you to do is flick through the pages and look for 2 ideas you like.

Take note of the design numbers. They start with Des***. Below is an example of what you will find in the file and where to find the design numbers.

Remember - we are only trying to find a design concept you like.

We will change the colours and the garment later!

Custom Designer Library - How to use it.

Step 2.

We need your choice of colours that you want us to use on the design concept.

If you have exact colour specifications (CMYK Specs) or pantone colours please supply us with them.

If you do not have exact colours, we normally look to see if you have the same colours you are asking for in your logo.

IMPORTANT : Exact colour specifications always give the best final result.

Step3.

We need to know what product (or products) you want the design concept on. You will find the product description or product code in the relevant catalogue.

Below is an example from our catalogues showing you where to find the product information.

The screenshot shows a product listing for 'Mens buttonless Sport Golfer'. It includes a product image, a detailed description, a size chart, and a product code. Red callout boxes highlight the 'Product description' and 'Product code' fields.

Size	Price
K1 to K3	R
K4 & K5	R
Xs & S	R
M & L	R
XL & 2xL	R
3xL	R
4xL	R
5xL	R

Product Code : MARSSGNB

You will find the start link to our catalogues here [Sublimated FX Catalogue](#)

Custom Designer Library - How to use it.

Step 4.

We need all your logo's in a print ready format. Sponsors will have the proper logo's for you in their marketing department and normally it is called a C.I. (Corporate Identity). Please refer to our document giving our file format requirements. [Acceptable File Formats](#)

If you are unable to supply a logo of acceptable quality, where possible, we will re-produce the logo for you at your expense (see artwork charges).

IMPORTANT : The best logo quality will give the best print result.

Step 5.

Send all the above information in an email and we will take it from there. To make your life easier we have prepared the email format for you to copy and paste. [Design Request Email Format](#)

If you have any questions, please send us an [email](#).

Remember, the library is only the starting point to creating a custom design for you. From your choice of design we change the colours to your colours, add your logo / s, names etc... and end up generating 1 or 2 concepts of what we think you may like.

Concepts are done in a rough format therefore we do not place any great precision in the accuracy of colours, logo's etc.

The concept is a "ONE OFF" no charge artwork. If you don't like the concept, you don't pay for it. Any changes require an order and a 50% deposit. No money - no changes.

Please note that there is a strict 2 free concepts per customer per order policy.

Additional concepts requested will be invoiced at R350.00 per hour, payment in advance.
